Summary

Final-year Computer Engineering undergraduate with hands-on experience developing full-stack and cloud-based applications using Next.js, React, TypeScript, Spring Boot, and PostgreSQL. Software Engineering Intern at FACTn Software, contributing to a multi-tenant Applicant Tracking System through database migration, asynchronous notification services, and Docker-based development. Seeking an entry-level Software Engineer or Full-Stack Developer role.

Education

University of Peradeniya 2022 – 2026
B.Sc. Engineering (Hons.) in Computer Engineering *Sri Lanka*

Ruhunu Vijayaba College 2007 – 2020
G.C.E. Advanced Level – Physical Science stream *Sri Lanka*

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, Java, C, C++, SQL
- **Frameworks & Libraries:** Next.js, React,
- **Backend & Technology :** Node.js, Spring Boot, REST API
- **ORM:** Prisma
- **Databases:** PostgreSQL, MySQL, Redis
- **Cloud & DevOps:** AWS, Azure, Docker, Firebase
- **Messaging & Tools** Git, GitHub, Apache Kafka

Experience

Software Engineering Intern Apr 2026 – Oct 2026
FACTn Software (Pvt) Ltd – CV Collector project

- Developed features for a multi-tenant Applicant Tracking System using Next.js, React, and TypeScript.
- Migrated the data layer from Azure Table Storage to PostgreSQL using Prisma ORM, including database schema and repository development.
- Developed a Notification Service using Kafka, Redis, AWS SES, and Firebase, with asynchronous notification processing and Docker.

Casual Instructor Nov 2024 – Mar 2025
Department of Computer Engineering, University of Peradeniya *Sri Lanka*

- Assisted students with C programming and Digital Design laboratory exercises.
- Supported students in debugging C programs and solving practical programming problems.

Projects

Neuromorphic Smart Sensor for Autonomous Underwater Vehicles 2025 – 2026
University of Peradeniya *Sri Lanka*

- Developed a power-efficient underwater sensing and localisation system using Spiking Neural Networks on embedded platforms.
- Implemented hybrid localisation combining dead reckoning, surface GPS support and acoustic measurements.
- Optimised sensor-fusion algorithms for autonomous, low-power, long-duration operation.
- **Tools:** Python, C, C++, Jetson Nano , ROS 2, Gazebo

Secure X Smart Locker System 2024 – 2025
University of Peradeniya *Sri Lanka*

- Developed an IoT-based smart locker system with real-time reservation, availability tracking, and centralized monitoring..
- Integrated fingerprint authentication with ESP32-based embedded hardware for physical access control.
- Developed responsive web and mobile dashboards for locker management and monitoring.
- **Tools:** ESP32, React, Flutter, Spring Boot, AWS

FoodBuddy – Food Waste Reduction Platform 2024
University of Peradeniya *Sri Lanka*

- Developed a cross-platform platform connecting restaurants with nearby customers to distribute surplus food.
- Developed responsive web and mobile interfaces with authentication and real-time product availability.
- **Tools:** Flutter, React, Spring Boot, AWS, MySQL

Leadership & Community Engagement

Associate Batch Member, Hackers' Club 2025 – 2026
University of Peradeniya *Sri Lanka*

- Participated in technical workshops, coding sessions and peer-learning activities.
- Contributed to collaborative technical activities and competitions.

Associate Batch Member, EngEx Subcommittee 2025
Faculty of Engineering, University of Peradeniya *Sri Lanka*

- Co-organised EngEx 2025, the largest engineering exhibition in Sri Lanka.
- Led the University of Peradeniya outreach program, engaging school students and the public.
